

EDV-250 0 THERMAL ELECTRIC DEHUMIDIFIER

KEY MINI DEHUMIDIFIER POINTS:

- Environmentally friendly
- Helps prevent mold and mildew
- Allergy and asthma relief
- Water Tank Capacity: 2 liters
- Peltier technology/no compressor
- Auto cut-off with LED indicator

SPECIFICATIONS:

Style Code: EDV-2500
Size: 6.75"L x 8.5"W x 13.5"H
Packaging: Color gift box
Master CTN: 4 pieces
Individual Weight: 7lbs.

Regular Price: \$159.95

Sale Price Just \$127.96

DEHUMIDIFIER BENEFITS (Excellent for full-time RV 'rs):

The Eva-Dry mid-size Dehumidifier uses Peltier technology which makes it light and quiet. It is perfect for bathrooms, and small to mid-size rooms where dampness and humidity are a problem. This unit is small enough to easily fit on your counter top, boat, or RV. It extracts the moisture from the air and stores it in a spill-proof reservoir. Just plug it in and it quietly gets to work.

Peltier technology (no compressor) is a very economical and quiet way to dehumidify. Using only a fan and two aluminum plates to dehumidify (one warm, one cool). The unit will draw humid air over the warm plate and heat the air up, once heated, it moves the air over the cool plate which will draw the condensation trapping it in the removable reservoir and expelling the dry air out.

This unit absorbs 20.6 ounces of moisture in a 24 hour period at RH of 80% at 86° F.
